

ANMF/HERC CPD SESSION

CPR & ANAPHYLAXIS MANAGEMENT

This workshop is designed to meet the needs of nurse immunisers continuing professional development requirements around maintaining clinical knowledge of anaphylaxis.

This session is aimed specifically at nurse immunisers needing to complete their mandatory training on CPR and anaphylaxis management. This workshop benefits any registered nurse, enrolled nurse or midwife who is required to complete basic life support training and an assessment for adults, paediatrics and infants.

During the workshop, participants will cover anaphylaxis recognition, management and treatment as well as practical training in Cardio Pulmonary Resuscitation. These skills will then be applied in a practical scenario. There will be an online training component to be completed prior to this session. Anaphylaxis and the treatment and management required post immunisation will be covered in detail before these skills and knowledge are applied in a practical scenario.
